ICANN from JPA to AoC

- We would like to encourage you to expose your ideas on the following questions

ICANN from JPA to AoC

1. How will GAC deal with the new role (if any) they have at this new environment?

2. How to improve ALAC/GAC relationship in order to assure users voice will be better considered?

3. Is this new environment take ICANN to be really international in a shorter period of time?
    Can ALAC/ At Large contribute in a more practical way to accelerate this process?

4. What is the "big picture" of the changes ICANN need to go through?

감사합니다.

Thank You – Merci – Obrigado
