IRTP Part B PDP WG Update

Michele Neylon
Chair

October 2009

Background

- Inter-Registrar Transfer Policy (IRTP) is a consensus policy adopted in 2004 – it provides a straightforward process for registrants to transfer domain names between registrars

- As part of an overall review of this policy, a WG identified issues for improvement and clarification

- Current Policy Development Process, part B, is aiming to address 5 questions (see next slide).

Charter Questions

a) Whether a process for urgent return/resolution of a domain name should be developed

b) Whether additional provisions for undoing inappropriate transfers are needed, especially with regard to disputes between a Registrant and Admin Contact

c) Whether special provisions are needed for a change of registrant when it occurs near to the time of a change of registrar

d) Whether standards or best practices should be implemented regarding use of Registrar Lock status

e) Whether, and if so, how best to clarify denial reason #7: A domain name was already in 'lock' status provided that the Registrar provides a readily accessible and reasonable means for the Registered Name Holder to remove the lock status

Recent Developments & Next Steps

- GNSO Council decided to initiate a Policy Development Process at the ICANN meeting in Sydney on 24 June

- A Working Group has been created and has started its deliberations on the charter questions

- Public comment period held – WG will now review comments received

- IRTP Part B WG Open Meeting at the ICANN meeting in Seoul (Monday 26 Oct at 7.00 local time)
