

.ORG DNSSEC

ICANN Seoul
October 2009

Beta Test Program Milestones

- » .ORG approved by ICANN to proceed with DNSSEC
June 2008
- » .ORG zone signed June 2, 2009
- » Largest gTLD to sign – we felt this was a good signal to
the industry to move from R&D to implementation

Beta Test Program Milestones

- » Over 30 domains signed to date. We have manually inserted the DS records at the Registry
- » Public-facing domains include:
pir.org, icann.org, iana.org, isoc.org, isc.org, ietf.org,
iab.org, irtf.org, iesg.org, sanog.org

Beta Test Program Milestones

- » Registrars are participating in the testing phase
 - 2 registrars have passed their certification test
 - We are conducting a Registrar education program via webinar within the DNSSEC Coalition

- » Shinkuro and Sparta are testing and documenting domain transfers of DNSSEC signed domains within the OT&E environment

- » Getting good operation practice with key rollovers

Beta Test Program Milestones

- » We expect to complete our internal testing by end of year 2009
- » Production launch – targeting first half of 2010
 - Shift to enabling Registrars to submit live delegations
