How Did We Do It?

- **Ubuntu**
8.04.2 LTS (Server Edition)
- **CoCCATools**
Automated Zone Generation
- **Provisioning Script (Perl)**
BIND9 Tools
scp (instead of Hidden Primary)
cron
- **Serious Redundant Backup**
- **Serious Firewalling**

Lessons Learned

- Hide the Key!
- RTFM!

Those Abbreviations...

- Lawrie's Laws:

*If it Works on the First Attempt, there is
Something Seriously Wrong!*

*You Don't Need to Hire a Consultant, a
Friend on the Other End is All you Need!*

Thanks
